

Info from

Vale Des

In this issue of our newsletter, we note with sadness, the passing of our friend and colleague Des Newman.

Those who knew him, would be aware that he would hate a fuss like this being made. "Just get on with it", would be his inevitable comment.

However, at Westflex we reflect that the success of the company would have been impossible without him. A trained chemist, his technical knowledge was the bedrock of our beginnings back in 1999. Not least in the formulation of our signature product Starpoint.

As Technical Director, a term he found hopelessly pretentious, he was never one to stand on ceremony, constantly refining our processes and looking to the future. In recent times, he refused to let his illness be a burden to others. Instead focussing on the future direction of the company, and on passing on his considerable expertise to others.

Des, you will be missed.

13th August 1944 – 29th November 2014

Des Newman

EcoSafe Range

New environmentally friendly products from Nutech are now available.

EcoSafe Concrete Etch

A water based surface prep etching compound specifically designed to provide a surface profile on green and mature concrete. Fast acting with low odour and easy clean up with running water!

The depth of etching achieved is the same as that of hydrochloric or muriatic acid and it's suitable for vertical and horizontal surfaces.

Available in 20 litre

Available in 5, 10 & 20 litres

Industrial High Strength Degreaser

A heavy duty cleaner that is biodegradable, user friendly and environmentally safe. Extremely effective for commercial, residential, automotive and marine industry.

Typical Uses:

- ★ Concrete driveways
- ★ Lockers
- ★ Garage floors
- ★ Barbeques
- ★ Engine parts
- ★ Machinery

Starpoint Weather Tips

If only Mother Nature listened to those who worked out in the elements to ensure we had a good run of weather to get the job done!

Unfortunately this is not the case and we have to heed to the ever changeable and unpredictable conditions she throws at us.

Starpoint is manufactured as an 'all year mix' so there is no 'winter' or 'summer' mix which ensures any product you hold can be used at any time. To ensure the product is at its optimal use, store properly

sealed and out of direct sunlight.

In summer, particularly when the heat is extreme from the start of the day, you can aid application by watering down the ridges with a garden hose to cool down the bedding and ridges.

Starpoint Retardant can also be used in warmer weather do

help maintain a wet edge during application. Add 100 mils of Starpoint Retardant per 10 litres of Starpoint and mix through.

A judgement needs to be made of the conditions for each particular roof. The factors that need to be taken into consideration when making a judgement are ambient temperature, humidity, sunshine and wind. In broad terms temperatures below 15 degrees will extend the curing time. The higher the humidity, the more heavily overcast and the lack of wind will all extend drying times.

STARPOINT DISTRIBUTOR IN FOCUS

Western Corp Hardware

Western Corp Hardware was created by Matthew & Asha Meyerhoff and Dave & Glenda Brooks in Feb 2007. Both Dave & Matt were new to this type of business but with a lot of hard work and determination they developed a strong plastering client base and a sturdy reputation.

As time progressed and situations changed, Matt became the sole owner and with continued help from Glenda he pushed forward and began researching new avenues of service for the store to provide. From this, Western Corp Hardware delved into concreting and construction supplies including Starpoint flexible pointing.

WCH have been providing quality hardware and equipment to Port Kennedy and beyond for 7 years and take great pride in ensuring

Congratulations to WCH for ingeniously building their entire showroom out of StarPoint tubs.

their products are top of the range. They not only supply to tradesmen but also the general public as well as owner/builders.
